

Notice to Mariners No 11 of 2020

Jersey Territorial Waters

Diving operations during Coronavirus (COVID-19) pandemic

Mariners are advised that due to the on-going COVID-19 Pandemic, the office for Health and Social Care in Guernsey has suspended the operation of the Guernsey Hyperbaric Chamber until further notice (see [States of Guernsey media release](#) and [Guernsey Local Notice to Mariners 009/2020](#) for further details).

Mariners involved in diving operations are advised to review their operations to ensure only essential activities are carried out and must take the above into consideration in their risk assessments.

Mariners are finally reminded to review and be familiar with General Direction 03 – Diving and swimming – when carrying out essential diving operations in Harbour Areas, Approach Channels and around the Coast of Jersey. The General Direction 03 can be found on Ports of Jersey website or via the link [here](#).

This notice will remain in force until a cancellation notice is issued.

Captain Bill Sadler
Harbour Master, Jersey Harbours
