

Quality of Service Report

1st October– 31st December 2021

Ports of Jersey Quality of Service Report

Period 1 October to 31 December 2021

Introduction

Ports of Jersey (POJL) is pleased to provide the third Quality of Service report since these reports were reinstated after being suspended for 15 months due to the pandemic, recommencing in April 2021. The reports will once again be published at the end of each quarter and will be available on our website, www.ports.je. We welcome comments from interested stakeholders on the measures they believe are most important to them and ideas on how we might extend and improve the effectiveness of this report. Please email any comments relating to this report to ask@ports.je

PoJL believes it is important to be as transparent as possible in providing customers and interested parties with information relating to the historic quality of service of the airport, marinas and harbour in Jersey. However, it is important to acknowledge that for many of the quality-of-service measures, parties other than POJL play an important (and in some cases primary) role in delivering the services. Therefore, POJL may have very little or no influence at all on the measures reported – for example, delays to an incoming flight are primarily caused by factors earlier in the aircraft’s schedule on that day, which are outside of POJL’s control.

The impact of the pandemic on travel continues to be significant. The return of passengers travelling in and out of Jersey has happened more quickly than our highest projections, well-ahead of other UK airports. This reflects the strength of the Island’s demand to travel and the popularity of Jersey as a safe holiday destination in comparison to other destinations where travel restrictions and costly testing requirements have been a feature. This is good news for Jersey but brings significant challenges for PoJL and our business partners in re-establishing previous operational levels at speed.

The information in these reports continues to reflect just how fluid the situation has been, and it will take some more time before a new set of ‘norms’ becomes clear. What is clear is that people want to travel and PoJL and its Business Partners are continuing to work tirelessly to match this pent-up demand.

Airport Quality of Service

Punctuality of flights to and from Jersey Airport (excluding due to weather¹)

	Proportion of flights within 15 minutes of scheduled time	Proportion of flights cancelled
Arriving flights	80.55%	1.18%
Departing Flights	77.85%	1.12%

- The number of flights arriving early dropped by 7% compared to the previous period, this is likely to be a reflection on the increase in traffic movements across the UK as more people choose to travel again.

¹ Please note these figures exclude the impact of weather, either in Jersey or at other airports as this is outside of the airport’s control.

- The percentage of flights departing on time increased during this period which historically reflects the short taxiing distances, the availability of stands and the ability to provide quick aircraft turnarounds in Jersey, particularly as we moved into the quieter winter season.

Aircraft Stands

Availability of Aircraft Stands	
Percentage of time when aircraft stands were available	100%

As in the previous quarter, there were no instances of stands being unavailable which led to a delay to an aircraft during the reporting period.

Time for passengers to clear security

We recognise that minimising the queueing time to clear security is very important to our passengers and we track and monitor this throughout the operating hours of the airport. These figures show the average time taken for passengers to pass through security, from the moment they join the queue until they have cleared the screening process.

Queueing time to clear security	
Percentage of time for which the queueing time to clear security was 15 mins or less	89.63%
Percentage of time for which the queueing time to clear security was 15 to 30 mins	8.69%

- Due to the speed of the return of passengers the Security resourcing has not always matched demand leading to longer queueing times in Security than pre-pandemic. During this period PoJ successfully recruited more Security employees and embarked on a programme of continuous improvement in this area to ensure that both the resources and infrastructure match the demand for the 2022 flight schedules.

Baggage Handling

Time taken to unload baggage	
Percentage of flights for which final bag was delivered to the carousel more than 20 minutes after arrival	28.45%
Percentage of flights for which final bag was delivered to carousel more than 45 minutes after arrival	Less than 0.1%

- During this reporting period the percentage of flights where the last bags took more than 20 minutes to be delivered to the carousels was less than the previous period but still higher than previous years which reflects the continuing challenges faced by the Ground Handling teams as they rebuild operations.

Harbour Quality of Service

Given the different nature of the operations at St Helier Harbour, we report on a different set of quality-of-service measures compared to those of the airport.

Punctuality of sailings

The punctuality of all sailings is assessed against the targets set out in the Condor Ferries Operating Agreement, which are shown in the table below:

Journey duration	Moderate delay means a delay of:	Material delay means a delay of:
0-4 hours	30-60 mins	more than 60 mins
4-8 hours	60-90 mins	more than 90 mins
8-12 hours	90-120 mins	more than 120 mins

Punctuality of sailings to Jersey	
Proportion of sailings subject to moderate delay events	3.02%
Proportion of sailings subject to material delay events	12.45%
Proportion of sailings cancelled (non-weather related)	0.04%

- This reporting period saw significant disruption and cancellations to sailings due to several periods of bad weather that affected both the high-speed craft and conventional ships.

Availability of Berths

Availability of Berths	
Percentage of time when berths were available	100%

There were no instances of berths being unavailable which led to a delay to a vessel sailing.

Marina Quality of Service

Due to the nature of its operations, it is more difficult to measure the quality of service of the marinas than the airport or harbour. For this reason, we only report on one measure – number of customers waiting for a new berth.

Number of customers waiting for a new berth

We provide information about the number of people on the waiting list for a permanent berth split by location (La Collette and Elizabeth/St Helier) and length of vessel (up to 6 metres, 6-10 metres, 10-15 metres and over 15 metres). Demand for the 'all tide' marina at La Collette is very high and berth holders at this marina tend to retain them, so there is very little 'churn'. The estimated waiting time to be allocated a berth in Elizabeth/St Helier Marina averages around 12 months, while at La Collette it is 8-10 years. However, over 80% of the people on the waiting list for La Collette already have a berth in another Marina in Jersey.

Length of vessel	Elizabeth/St Helier	La Collette
	Number on waiting list	Number on waiting list
0-6 metres	12	16
6-10 metres	121	147
10-15 metres	124	93
More than 15 metres	87	11

- The significant investment in the Albert Pier was completed in this period, this has seen the creation of all-tide berths for larger yachts.
- The refurbishment of the St Helier marina also commenced in this period. This project will see the removal and replacement of the aged guide piles and pontoons that have now reached the end of their serviceable life, ensuring the marina can continue to provide a vibrant environment for local and visiting mariners for many years to come.

Complaint handling

Ports of Jersey carefully monitors both the number of complaints that we receive at the airport, harbour and marinas and how quickly they are handled.

	Number of complaints closed in 10 days or less	Number of complaints closed in 10 to 20 days	Number of complaints closed in more than 20 days	Total number of complaints
Airport	23	0	0	23
Harbour	0	0	0	0
Marinas	0	0	0	0
Total	23	0	0	23

Where a complaint is received by Ports of Jersey, we make every effort to deal with it as quickly and as effectively as possible in accordance with our complaints policy and procedure², which sets out a 14-working day period to resolve complaints.

Ports of Jersey January 2022

² POJL's Complaint Policy and Procedure has been approved by CICRA and can be found at:
