

Safety Bulletin № 04 of 2018

Permanent closure of the Jersey Hyperbaric Treatment Centre

Jersey Coastguard has been advised by the operators of the Hyperbaric Treatment Centre that it has been closed permanently as of April 2018.

The nearest available hyperbaric facility is located in Guernsey.

Divers and diving organisations are reminded to take this into account when planning diving activities. Consideration should be given to introduce alternative recovery methods and incorporating them into individual risk assessments.

In the event of a diving emergency at sea, contact Jersey Coastguard on VHF Ch 16, or dial 999 and ask for the Coastguard.
